

Bioretec is preparing for future growth by expanding and creating a state-of-the-art manufacturing facility

Bioretec is preparing for future growth by expanding and building a new state-of-the-art manufacturing facility for the new RemeOs™ products. Bioretec will continue to serve customers as efficiently as always, even during the relocation process.

“The cornerstones of our operations have always been high quality and continuous improvement. Relocating to a new manufacturing facility will improve our operational capability and logistics as well as provide additional possibilities for expanding the product portfolio”, explains Timo Lehtonen, CEO, Bioretec.

Bioretec’s target is that the new manufacturing facility will be operational by autumn.

“The new location at Tampark Business Park will enable us also to organise customer events, product-specific training courses and symposiums. Additionally, the Tampark Business park has good transport connections to the city center and Tampere airport. We are proud to welcome our customers and stakeholders to our new location once the new facility is operational”, Lehtonen says.

Tampark Business Park visiting address: Yrittäjänkulma 5, FI-33710 Tampere, FINLAND
Bioretec’s address for deliveries and pick-ups of goods: Yrittäjänkulma 5, door 7, FI-33710 Tampere, FINLAND
